THE UNITED REPUBLIC OF TANZANIA NATIONAL EXAMINATIONS COUNCIL OF TANZANIA DIPLOMA IN SECONDARY EDUCATION EXAMINATION

731/1

PHYSICS 1

Time: 3 Hours

Year: 2020

Instructions

- 1. This paper consists of sections A, B and C with a total of sixteen (16) questions.
- 2. Answer all questions in section A and two (2) questions from each of sections B and C.
- 3. Section A carries forty (40) marks and sections B and C carry thirty (30) marks each.
- 4. Mathematical tables and non-programable calculators may be used.
- 5. Communicative devices and any unauthorised materials are **not** allowed in the examination room.
- 6. Write your Examination Number on every page of your answer booklet(s).
- 7. The following information may be useful:

Pie,
$$\pi = 3.14$$

Atomic mass of carbon atom =
$$12$$

Atomic mass of oxygen atom =
$$16$$

SECTION A (40 Marks)

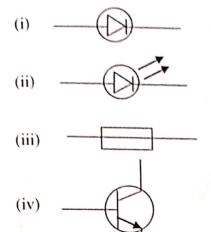

Answer all questions in this section.

- 1. Show that, the angular momentum and Plank's constant have the same physical units.
- 2. (a) Give the meaning of the term electrolysis.
 - (b) Derive the chemical equations that will take place at the anode and cathode electrodes during the electrolysis of copper sulphate solution.
- 3. A cart of mass 500 kg is standing at rest on the rail. If a man weighing 70 kg running parallel to the rail track with a velocity of 10 ms⁻¹ jump on the cart, compute the velocity with which the cart will start moving.
- 4. (a) What will be the effect on the temperature of the gas molecules inside the cooking gas containers in a lorry which is moving with a uniform speed? Briefly explain.
 - (b) Calculate the root mean square speed (r.m.s) of carbon dioxide gas molecules at normal temperature and pressure, given molar gas constant $R = 8.31 \text{ J mol}^{-1}\text{K}^{-1}$.
- 5. (a) Describe the concept of colours of oil film on water.
 - (b) The shortest length of air column in a resonance tube with one end closed is resonated to a note of frequency 500 Hz and found to be 160 mm. Determine the velocity of a sound wave.
- 6. How does heating of the room by thermal convection process occur?
- 7. Differentiate the following terms as applied in teaching and learning Physics.
 - (a) Teaching aids and improvisation
 - (b) Curriculum and syllabus
- 8. In four points, show how a physics teacher uses an "Observation Schedule" to assess student's practical work.
- 9. With two examples in each case, describe two categories of Physics curriculum material.
- Briefly describe four steps you would follow to provide first aid to an electric shock victim in Physics laboratory.

SECTION B (30 Marks)

Answer two (2) questions from this section.

- 11. (a) With the aid of a well labeled diagram, explain electrical properties of semiconductors basing on the band theory of solids.
 - (b) Why **n-p-n** transistors are more commonly used than **p-n-p** transistors?
 - (c) What does each of the following symbols represent?

- 12. (a) What are the four characteristics of radioactive decay?
 - (b) A half life of a radioactive material contains 10¹⁸ atoms is 2 days. Calculate the fraction remaining and the activity of the sample after 5 days.
 - (c) (i) Find the mass number and atomic number of an atom X with 19 nucleons and 10 neutrons.
 - (ii) If the atom in part (c)(i) is bombarded with an alpha particle, what will be the resultant mass number and atomic number of the daughter nucleus?
- 13. (a) Show how the earth's climate is affected by green-house effect.
 - (b) Draw the vertical structure of the atmosphere and;
 - (i) indicate the five layers from the surface of the solid earth.
 - (ii) show the variation of temperature gradient from the surface of the earth.
 - (c) State two importance of the first atmospheric layer from the surface of the solid earth.

SECTION C (30 Marks)

Answer two (2) questions from this section.

- 14. Design a table which shows the lesson development part of a lesson plan of 80 minutes when you are planning to teach the concept of Friction Force in a Form Three class.
- 15. Use six steps to show how a physics teacher can teach the concept of "Effect of Turning Forces" to Form Two students by the demonstration method.

Page 3 of 4

alimu2020

16.	"The principles of teaching and learning physics enable students to understand well the subject". Support this statement by using five points.
	그리고 있다. 그리고 그는 그는 이 사람들은 그리고 있다. 그리고 있는 사람들은 그리고 있는 것이 되었다. 그리고 있다는 것이 없는 것이다. 그리고 있다는 것이다.
