    B: RAM

    C: Flash drive

    D: CD-ROM

    ii) Which of the following is an example of output that can be both visual and tactile?

    A: Printer

    B: Touchscreen

    C: Monitor

    D: Scanner

    iii) What type of software is responsible for managing hardware resources and providing services to application programs?

    A: Application software

    B: System software

    C: Programming language

    D: Utility software

    iv) Which of the following is **not** considered a cloud computing service?

    A: Google Drive

    B: Dropbox

    C: Microsoft Excel

    D: iCloud

    v) Which device converts digital data into analog signals suitable for transmission over telephone lines?

    A: Modem

    B: Router

C: Switch

D: Hub

vi) A computer designed for a single user that combines all components in one unit is called:

A: Desktop

B: Mainframe

C: Microcomputer

D: Supercomputer

vii) Which of the following is **not** a feature of presentation software?

A: Slide transition

B: Slide sorter

C: Font formatting

D: Spreadsheet calculation

viii) Which of the following devices is used to assist visually impaired students in reading text on a screen?

A: Screen magnifier

B: Braille printer

C: Joystick

D: Barcode reader

ix) Identify the software that protects computers from malicious programs.

A: Firewall

B: Antivirus

C: Disk defragmenter

D: Word processor

x) Which of the following represents a small personal network within a building?

A: LAN

B: WAN

C: MAN

D: PAN

2. Match the items in Column A with the correct descriptions in Column B. Write the letter of the correct match in the table below.

COLUMN A

i. Device that amplifies signals in a network

ii. Device that tracks moving objects using satellites

iii. Device that detects light intensity and converts it to an electrical signal

iv. Device used to read magnetic stripes on cards

v. Device that outputs sound

COLUMN B

A. Microphone

B. GPS tracker

C. Speaker

D. Card reader

E. Repeater

F. Modem

G. Touchpad

H. Webcam
