SMZ

ZANZIBAR EXAMINATION COUNCIL

FORM THREE ENTRANCE EXAMINATION

PHYSICS

TIME: 2.30 Hours

Friday 18th September, 2015

INSTUCTIONS TO CANDIDATES

- 1. This paper consists of THREE sections A, B and C.
- 2. Answer all questions in section A and B. Choose any two questions in section C, Question 9 is compulsory.
- 3. All answer must be written in the space provided under each guestion.
- 4. Write your examination number on each page.
- 5. Cellular phones are not allowed in the examination room.
- 6. Where necessary the following constant may be used.
 - i) Acceleration due to the gravity, $g=10m/s^2$ ii) Pie, $\pi = 3.14$

2. Match each item in list A with a correct response in List B by writing is letter below of the corresponding item in the table provided

3. For each of the items (i) – (x), fill in the blank spaces by writing the correct answer on the answer booklet provided

- Action and reaction forces never cancel because they act on_____ body.
- ii) The property of liquid to form a layer which supports a pond skater to walk on it is called ______.

iii) The length of path taken by an object in motion ______.

- iv) Sea wave energy is as a result of ______ the sea.
- v) A screw jack work in the same way as ______.

Page 4 of 16

CANDIDATE'S NUMBER _____

- vi) The suns ray travel in _____ line.
- vii) Point where the net magnet field is zero is called ______.
- viii) The automatics flushing tank uses the working principle of
- ix) The force that resists the movement of object through air
- x) The presence of electric charge in a body can be detected by means of

SECTION B (50 Marks) Answer all questions in this section

4. a) State Pascal's principle of hydraulic press

 Explain why hitting an inflated balloon with hammer will not cause it to burst but sticking it with pin will burst

A hydraulic break in certain machine has force of 600N applied to piston whose area is 5m².

i) What is the pressure transmitted throughout the liquid?

.

Page 5 of 16

		CANDIDATE'S NUMBER
		ii) If the other piston has area of 20m ² , what the force exerted on it?
5.	a)	State Archimedes principle
	b)	Explain briefly why a ship made of steel float in water while coin sink in water

SECTION C (20 Marks)

Choose any two 2 questions in this section. Question 9 is compulsory and. Answer either 9(a) or 9(b)

9. a) In one experiment small, a small steel sphere was released from an

electromagnet and fell under the gravity until it hit a metal surface.

The reading recorded in the table below were obtained

H (cm)	20						
	28	40.5	52.8	65.6	78.1	92.0	
T (s)	2.40	2.87	3.38	3.67	3.99	4.33	
T ² (s ²)							1

i) Complete the table above by calculating the value of T^2

ii) Plot the graph of H against T^2

Page 12 of 16

ii) Find the slope of the graph in (a) (ii) above.

-

iii) If the slope of your graph is $\frac{g}{200}$ where g is the acceleration due to gravity, calculate g

b) An experiment made by the two students from Haile sallasie secondary school to determine the résistance of the given conductor was carried out and part of the result were as follows:

Votage,V(v)	2	6	10	14	18
Current I(A)	0.1	0.4	0.7	1.0	1.3

Page 13 of 16

i) Plot of the graph of V against I

,

يستريده والمراقب والمستعمل والمعارفة والمناقب والم

ii) Find the slope of the graph, what the slope mean

iii) State the law that obey in this experiment

Page 14 of 16
